Summary

Results-driven MERN Stack Developer with 1+ year of hands-on experience in designing, developing, and deploying responsive, scalable, and high-performance web applications using MongoDB, Express.js, React.js, and Node.js. Strong understanding of full-stack development, RESTful API integration, authentication & authorization (JWT), database management, and modern responsive UI/UX design. Proficient in JavaScript (ES6+), React Hooks, reusable component architecture, and backend service integration. Experienced in building user-friendly applications with clean, maintainable, and optimized code. Passionate about learning emerging technologies, solving real-world problems, and contributing effectively in fast-paced development environments.
